

Magnific Popup is a responsive lightbox & dialog script with focus on performance and providing best experience for user with any device (for jQuery or Zepto.js).

[Documentation](#) · [GitHub](#) · [WordPress plugin](#) · [Build tool](#) ·  [How it was made](#)

Examples

at max resolution available in the browser

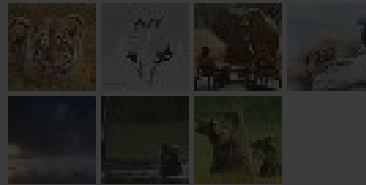

Single image lightbox

Three simple popups with different scaling settings.
1 — fits horizontally and vertically,
2 — only horizontally,
3 — no gaps, zoom animation, close icon in top-right corner.

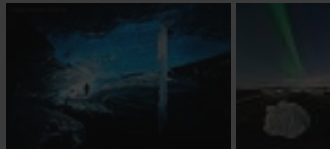

Lightbox gallery

You may put any HTML content in each gallery item and [mix content types](#). In this example lazy-loading of images is enabled for the next image based on move direction. If you wish to add touch-swipe support, check [my article](#) on the Smashing Magazine, or [new PhotoSwipe](#) script.

Zoom-gallery

If you wish to open the popup only after image is fully loaded, you may preload image via JS. Or use scaled down image instead of thumbnail. Zoom effect works only with images, for now.

Popup with video or map

In this example lightboxes are automatically disabled on small screen size and default behavior of link is triggered.

[Open YouTube video](#)

[Open Vimeo video](#)

[Open Google Map](#)

Dialog with CSS animation

Animations are added with simple CSS transitions, you can make them look however you wish.

Popup with form

Entered data is not lost if you open and close the popup or if you go to another page and then press

Popup with video or map

```
$(document).ready(function() {  
  $(''.popup-youtube, .popup-vimeo, .popup-gmaps').magnificPopup({  
    disableOn: 700,  
    type: 'iframe',  
    mainClass: 'mfp-fade',  
    removalDelay: 160,  
    preloader: false,  
  
    fixedContentPos: false  
  } ) ;  
});
```

JS

```
<a class="popup-youtube" href="http://www.youtube.com/watch?v=002aH4XLbto">Open You  
<a class="popup-vimeo" href="https://vimeo.com/45830194">Open Vimeo video</a><br>  
<a class="popup-gmaps" href="https://maps.google.com/maps?q=221B+Baker+Street,+Lon
```

HTML

```
/**  
 * Simple fade transition,  
 */  
.mfp-fade.mfp-bg {  
  opacity: 0;  
  -webkit-transition: all 0.15s ease-out;  
  -moz-transition: all 0.15s ease-out;  
  transition: all 0.15s ease-out;  
}
```

CSS

```
.mfp-fade.mfp-bg.mfp-ready {
  opacity: 0.8;
}
.mfp-fade.mfp-bg.mfp-removing {
  opacity: 0;
}

.mfp-fade.mfp-wrap .mfp-content {
  opacity: 0;
  -webkit-transition: all 0.15s ease-out;
  -moz-transition: all 0.15s ease-out;
  transition: all 0.15s ease-out;
}
.mfp-fade.mfp-wrap.mfp-ready .mfp-content {
  opacity: 1;
}
.mfp-fade.mfp-wrap.mfp-removing .mfp-content {
  opacity: 0;
}
```

Code above is dynamically generated directly from the source of this example.
Please read [the documentation](#) before using it.

Browser support

Tested on desktop: Chrome, Safari, FF, Opera, IE8+, partial support of IE7 (works, but some visual layout features, like vertical centering, are missing). Mobile: default browser in Android 2.3+, iOS5+, Blackberry 10+, WP7+, mobile Opera and Chrome on Android. If you noticed any bug, please open an [issue on GitHub](#)

License

Script is available under MIT license and will always be kept this way.
But please do me a favor and do not create a public WordPress plugin based on it, because I will make it soon and it will be open source too. ([Want to get notified?](#)).

Bugs & contributing

Please report bugs via [GitHub](#) and ask general questions through [StackOverflow](#). Feel free to submit commit, even the tiniest contributions to the script or to the documentation are very welcome.

Special thanks to:

- [Lokesh Dhakar](#) for original Lightbox script.
- [Chris Coyier](#) for awesome CSS techniques.
- [Brad Frost](#) for conditional lightbox technique.

Updates

If you wish to get notified about important plugin updates, you may star and watch the repository on [GitHub](#), follow [me on Twitter](#), or join my tiny Mailchimp [email newsletter](#) that I send 3-4 times a year.

Please spread the word if you find the plugin useful
